

Intercultural Social Digital Environment (ISDE)

Proposal Idea for the H2020 CULT-COOP-09-2017 Topic

Zeus Consulting S.A.

research.zesuconsulting.com

Lack of effective interconnection of multiple minorities, religions, cultures and traditions in a modern societal environment:

- Unsuccessful inclusion of the large number of citizens in modern societies coming from different countries, bringing different cultures and traditions and with different educational levels.
- Adjustment to the society they resident or travel to, not easy, bringing out a huge perception gap with no existing solutions.

We propose **ISDE**, a smart application creating an open-friendly environment for users from all over the world in order to make simpler and easier habitants' and travelers' social adjustments in different multicultural societies.

ISDE solution

- Actually a complete interactive “encyclopedia” through which one can plan daily routines in various fields (*religious, cultural and traditional nutrition habits*) and schedule trips, providing an easy Adjustment-Anytime-Anywhere (e-AAA).
- **ISDE** is Smart Cloud application that includes multiple information and is adjustable to users’ religion, race, gender, age and use preferences.
- **ISDE** is more than a chat room or a simple travel guide. It combines social intercultural issues under a digital cloud network in a user friendly way, used from anyone to everyone utilizing several FIWARE technology components.

Consortium Partners

We are seeking for:

- Infrastructure provider
- Exploitation partner
- Universities
- Local End Users

Participants Skills:

- Cloud platform developers, researchers
